

Project Case Study

34 & 35 Cambrian Way - Dacorum Borough Council - Osborne Property Services

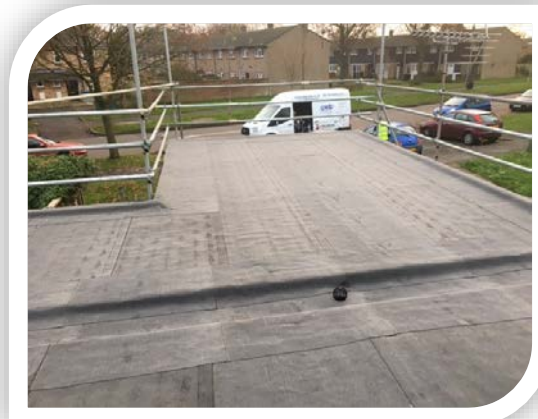

UK GUNITE LIMITED

On request from our client Osborne Property Services, UKG were asked to mobilise as a matter of urgency to remedy 2 leaking roofs to 34 & 35 Cambrian Way

The existing warm roof system was built up with insulation, mineral felt and stone chippings. After removal of stone chippings, it was evident that the existing felt was beyond its servicable life. This area was cleaned and then a layer of Profatherm Base SA carrier sheet was layed to entire flat roof area with ProBase PES SA to detailing areas.

Finally a 3mm coat of Prokol 260 FR Pure Polyurea Hotspray roof coating was applied. The coating was dry within 20 seconds and had an anti-slip finish.

All works warrantied for 30 years
